

WexproBI Partner Walk Through

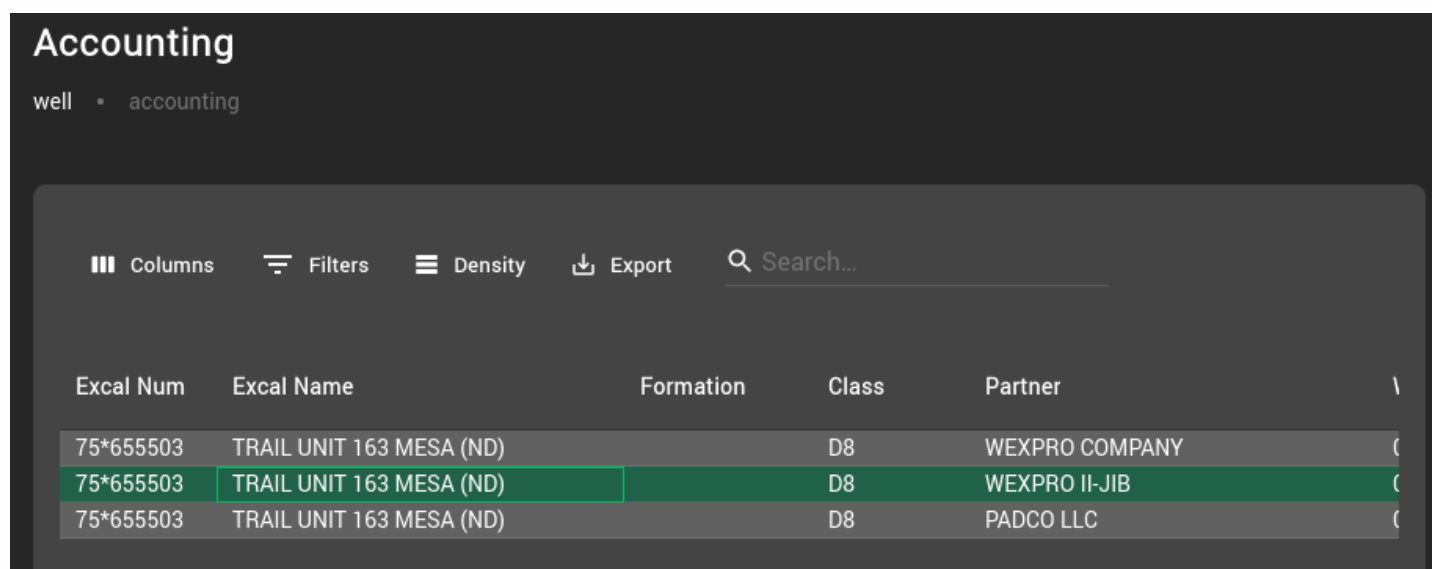

The partner configuration is done under the WexproBI well menu. First, the partners are setup under accounting, including email addresses, and then the actual permissions are configured under AFE.

It is recommended to configure non-consent partners also.

While daily reports are assigned to a specific AFE, WBD (wellbore diagrams) assigned to an API. A partner will receive WBDs until the existing permission is altered, or a newer AFE permission revokes the permission.

Well Accounting

- <http://slcplwell01/well/accounting>
- Select the Excalibur Billing Account the AFE is under by clicking on it

The screenshot shows the 'Accounting' section of the WexproBI interface. It features a breadcrumb trail 'well > accounting'. Below this is a table with columns: 'Excal Num', 'Excal Name', 'Formation', 'Class', and 'Partner'. The table contains three rows, all with the same 'Excal Num' (75*655503) and 'Excal Name' (TRAIL UNIT 163 MESA (ND)). The 'Class' is 'D8' for all rows. The 'Partner' values are 'WEXPRO COMPANY', 'WEXPRO II-JIB', and 'PADCO LLC'. The second row is highlighted in green.

Excal Num	Excal Name	Formation	Class	Partner
75*655503	TRAIL UNIT 163 MESA (ND)		D8	WEXPRO COMPANY
75*655503	TRAIL UNIT 163 MESA (ND)		D8	WEXPRO II-JIB
75*655503	TRAIL UNIT 163 MESA (ND)		D8	PADCO LLC

- This will load the Report Partners for the account selected.

Partners are no longer an automated pull/configuration from Excalibur. However, using the copy buttons will copy all the partners configured in Excalibur. From here, partners can be added or deleted.

This manual configuration will allow automation to be used during drilling and completion also.

Configure the Partners email addresses

- Select the partner by clicking on it
